**YOUR 9AM EYE EXAM
WILL CONCLUDE AT 7PM TONIGHT**

Today you get your eyes checked. And while a thorough eye exam may be completed in an hour's time, it's not uncommon to find your Clarus doctor staying late into the evening to review your tests and treatment plans, ensuring the best possible results from your visit earlier that day.

Dr. Rudd is a board-certified ophthalmologist, trained at some of the most respected eye institutes in the country, including the Wills Eye Hospital—named one of U.S. News & World Report's top-ranked ophthalmology centers. Utilizing the most advanced techniques and emerging technology for improving vision, Dr. Rudd is one of the few fellowship-trained refractive surgeons in the country.

For you, it means more options to help you see your world better, clearer. Come see for yourself what thousands have already found—the Clarus difference.
